

IBS STUDY TOUR 2017

LIMITED SEATS
(FIRST COME FIRST SERVE BASIS)

5 OCTOBER 2017

8.00 AM – 5.00 PM

SITE 1: MKH BERHAD @ Hillpark Shah Alam North

Through its partnership with PanaHome Malaysia Sdn. Bhd. in 2015, MKH began implementing the IBS System in the construction of its landed residential developments as a new way to build low-rise homes in Malaysia.

MKH's ongoing township development Hillpark @ Shah Alam North employs Japan-quality PanaHome technologies, specifically the Wall Pre-cast Concrete Panel (W-PC) construction method that utilises pre-fabricated materials and structure which involves less complex work and reduces construction time by producing and installing the W-PC panels directly at the development site.

SITE 2: SETIA PRECAST SDN BHD @ Bandar Setia Alam

Setia Precast Sdn Bhd, a wholly owned subsidiary of S P Setia Bhd has completed 21,000 units of IBS apartments using the Setia IBS system since 1996. The Setia IBS system fully utilises the advantages of prefabricated components for walls, lift cores, staircases, bathroom slabs and also special components such as decorative facade feature walls.

Setia IBS System simplifies construction work by increasing speed, safety and product quality consistency, reducing construction waste, reduces the need of skilled labour and enhance site safety. Setia IBS system has also successfully increased space efficiency through the use of beamless and column free design.
