

Registration System for Competent Person Identification Card (CPIC)

In the effort to encourage the registration of competent persons with the Energy Commission (EC), a registration system for Competent Person Identification Card (CPIC) has been implemented and a new module for CPIC template in the Energy Commission Online System (ECOS) has also been established. With CPIC, members of the public, building owners, Joint Management Body (JMB)/Management Corporation (MC) and EC officers are now able to check and identify whether or not the individual undertaking the electrical work is a competent person registered with the EC. The competent person must also carry the CPIC with them on site at all times.

The CPIC can now be printed via ECOS system at <http://ecos.st.gov.my> beginning from 7 November 2018.

Members are advised to adhere to the above accordingly.
